MONITOR TUBES

- 17 cm diagonal rectangular flat face
- 70° deflection angle
- high resolution
- quick heating cathode
- bonded face plate
- metal band for mounting
- M17-143WE: for use in precision monitors and as a viewfinder in television cameras

M17-145WE: for use in photographic equipment (see Optical Data)

MECHANICAL DATA (see also the figures on the next page)

Overall length 232 \pm 8 mm Neck diameter min. 27,8 mm

Base neo eightar, B8H; IEC 67-I-31a

Final accelerator contact cavity contact, CT8; IEC 67-III-2
Implosion protection bonded face plate

Net mass approx. 1 kg

Mounting

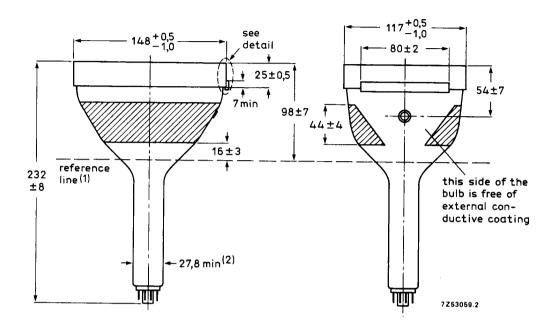

The tube can be mounted in any position. It must not be supported by the socket and not by the base region alone.

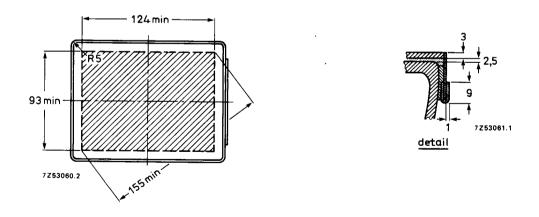

Accessories

Final accelerator contact connector 55563 A

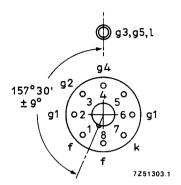

MECHANICAL DATA

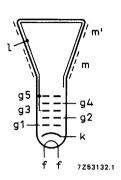

Dimensions in mm

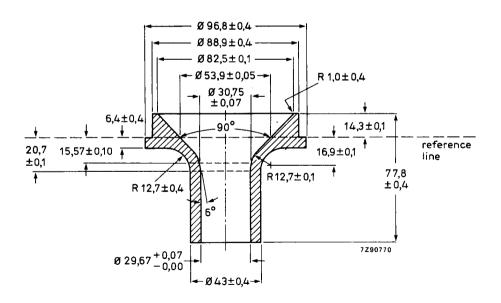

- (1) Reference line, determined by the plane of the upper edge of the flange of the reference line gauge when the gauge is resting on the cone.
- (2) The maximum dimension is determined by the reference line gauge.

X-RADIATION LIMIT

X-radiation limit curves, at a constant anode current of 250 μ A, measured according to TEPAC103A.

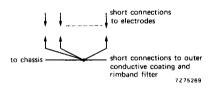

0,5 mR/h isoexposure-rate limit curves, measured according to TEPAC103A.

FL ASHOVER PROTECTION

If in the high voltage used with this tube internal flashovers may occur. These may destroy the cathode of the tube. Therefore it is necessary to provide protective circuits, using spark gaps.

The spark gaps must be connected as follows:

We other connections between the outer conductive coating and the chassis are permissible.
