

The LD-590 is a low noise traveling wave tube for operation over the frequency range 3,600 to 4,200 Mc/s. The nominal noise figure is 6.5db and the nominal gain at small signal level is 28db with a typical saturated power output of 3mW.

The tube operates in a solenoid type focusing mount with input and output waveguides.

General Characteristics:

Electrical

|                         |                     |
|-------------------------|---------------------|
| Heater Voltage .....    | 4 to 7 V            |
| Heater Current .....    | 0.6A Max.           |
| Frequency Range .....   | 3,600 to 4,200 Mc/s |
| Noise Figure .....      | 7.5db Max.          |
| Small Signal Gain ..... | 25db Min.           |

Mechanical

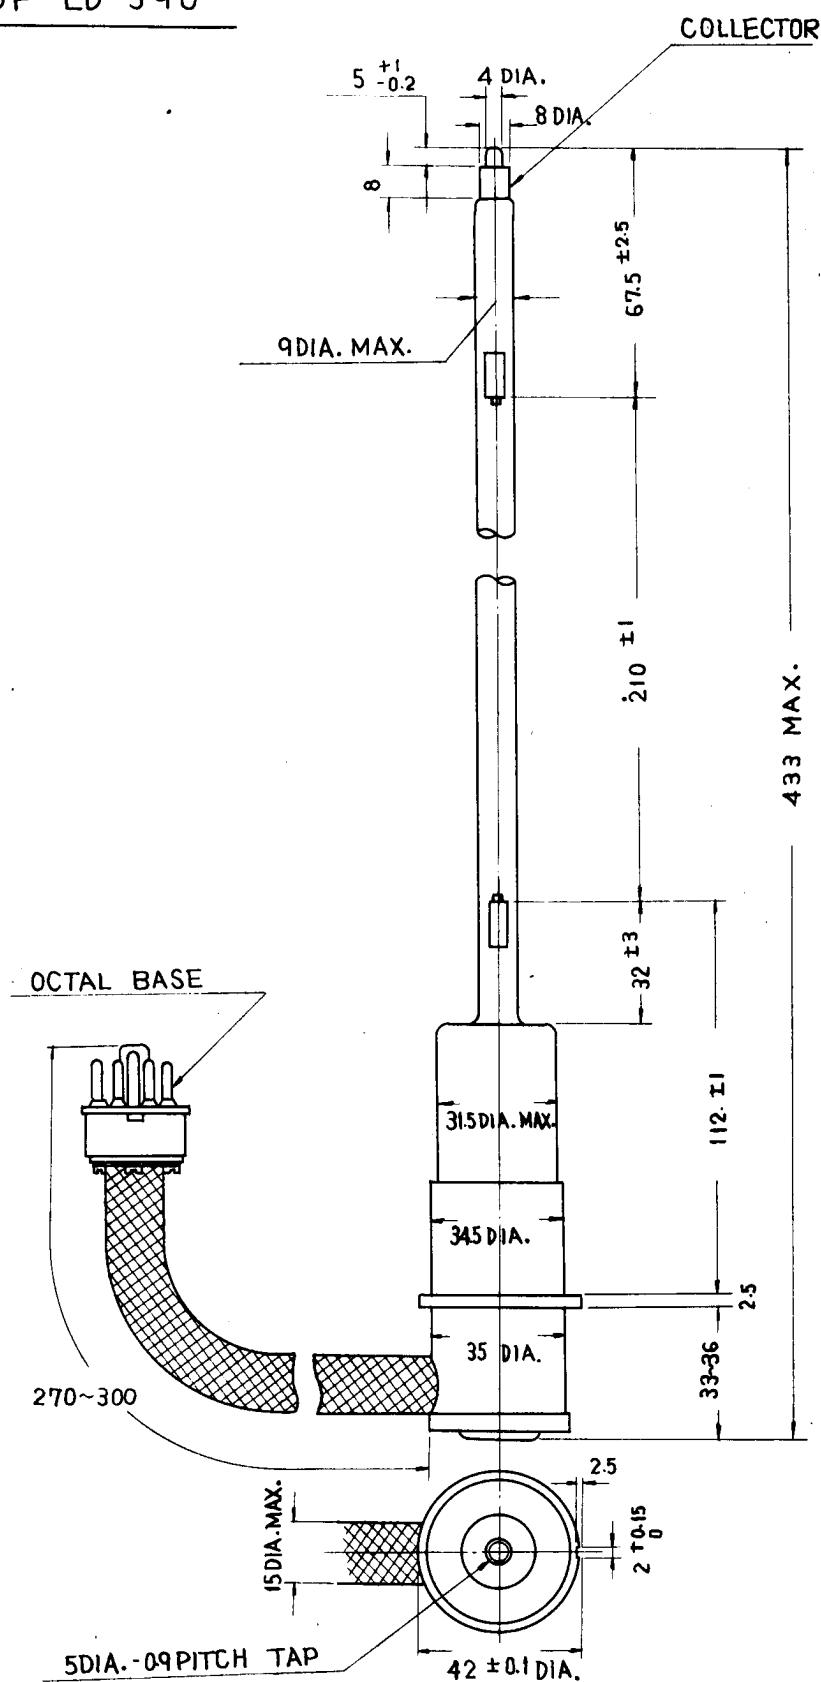

|                           |                     |
|---------------------------|---------------------|
| Mounting Position .....   | Any                 |
| RF Connection .....       | Waveguides          |
| Socket .....              | Octal Base          |
| Collector Connector ..... | Special Size        |
| Dimensions .....          | See Outline Drawing |
| Weight .....              | 250 grs.            |
| Cooling .....             | Natural             |

Typical Operation

|                               |  |
|-------------------------------|--|
| Frequency .....               | 4.170 Mc/s   |
| Heater Voltage .....          | 6.0 V  |
| Heater Current .....          | 0.45A  |
| Grid Voltage .....            | 0 V  |
| Anode 1 Voltage .....         | 20 V   |
| Anode 2 Voltage .....         | 45 V   |
| Anode 3 Voltage .....         | 380 V  |
| Anode 1, 2 & 3 Currents ..... | 0 $\mu$ A  |
| Helix Voltage .....           | 540 V  |
| Helix Current .....           | 0.2 $\mu$ A  |
| Collector Voltage .....       | 800 V  |
| Collector Current .....       | 200 $\mu$ A  |
| Magnetic Flux Density .....   | 700 gauss over the electron gun region and 580 gauss over the helix region |
| Noise Figure .....            | 6.5 db   |
| Small Signal Gain .....       | 28 db  |
| Saturated Power Output .....  | 3 mW   |

# OUTLINE OF LD-590

| BASE CONNECTION |                  |
|-----------------|------------------|
| 1               | NC               |
| 2               | ANODE 3          |
| 3               | HELIX            |
| 4               | ANODE 2          |
| 5               | ANODE 1          |
| 6               | GRID             |
| 7               | HEATER & CATHODE |
| 8               | HEATER           |

NOTE : DIMENSIONS ARE  
IN MILLIMETERS.
